

CIRCULAR NO. SHD/G/01062024

25 June 2024

To: All Ship Supplier Companies
CC: Singapore Ship-Chandlers Association
Singapore Association of Shipsuppliers and Services
Singapore Shipping Association

Reminder on Measures to Enhance Safe Operations Involving Ship Suppliers

1. As part of our regular review, kindly be reminded of the following measures to enhance safe operations involving Ship Suppliers.
2. Due to recent observations of improper securing of cargoes which can result in serious consequences to personnel at the wharf/vessel, we would like to remind that during lifting of supplies from/onto vessels, cargo net or cage in good working condition are to be used for every lifting operation. All supplies are to be properly secured. Tagline is to be used when necessary to control and guide load movement during material handling operations.

3. All port users are required to put on appropriate Personal Protective Equipment (PPE) such as helmet with chin strap secured, safety shoes, high visibility vest to protect themselves and minimize exposure to hazards that cause workplace injuries.
4. All personnel are to put on their life jackets securely when working/positioned near the sea, or when there is a risk of falling into the sea.
5. Embarking/disembarking from the vehicle should be from the landside instead of seaside.
6. For your compliance please.

Goh Teck Chin
Assistant Vice-President (Safety & Health Department)
PSA Corporation Ltd
